## EagleWatch Network DVR

The Price on this Top Notch Technology is Comparable to Those DVR's that Skimped on the Quality.

**We keep our cost low by building our DVR's to order. We keep our overhead low and can custom build your DVR. Please allow two weeks to process your order.**

**Demo units are in stock for emergency replacement only.**

Units needing repairs or upgrades can be fixed on-site or shipped overnight for an exchange while under warranty.

There is a **three year warranty** on all models of the EagleWatch Network DVR and there is **free training and technical support!**

We have made this DVR as simple to operate as possible, yet be capable of performing needed tasks as quickly as possible. Many safeguards are automatic and built-in to assure you have all the features needed to record, store and retrieve your camera images quickly and dependably.

# EagleWatch Network DVR

\*Delta Surveillance recognizes that the convergence of the security industry and the computer industry is happening with rapid success, but is undergoing a period of adjustments as the two industries merge and learn to compliment each other. More and more security products, such as alarm control panels and camera systems, are now computers.

\* We at Delta Surveillance know that security equipment must be reliable and dependable or it is a waste of money and a false sense of security. We also know that cost is a determining factor.

**Therefore**, in order to meet the security needs of our clients, we have developed a top of the line digital video recorder (DVR) that exceeds, in features and quality, the majority of the DVR's on today's market. We have been able to hold the cost of the EagleWatch Network DVR to below the average mid-range cost of DVR's. **However, our DVR is anything but average.**

\*The **EagleWatch Network DVR** was developed after over six years of research and testing various brands of digital video recorders in a real-world market.

\*The EagleWatch Network DVR is different. Using rock solid software written especially for Windows XP computers and using the Intel Chip and Processor specifications, the EagleWatch Network DVR is one of the finest, fastest and most dependable DVR's ever assembled.

\*We did skimp on the profit margin however. What good is the DVR if no one can afford it?

## WHAT IS WRONG WITH TODAY'S DVR'S?

1. The current DVR manufacturers do not seem to understand the security industry. They are mostly computer builders who have no or little professional experience with security-related issues.

**WE UNDERSTAND THE SECURITY INDUSTRY AS WELL AS THE MARVELS OF THE COMPUTER DRIVEN DVR. We have been in the security industry since 1976. We also have technicians who are very computer literate and they know the ins and outs of pc computers and their many parts.**

2. Most DVR's are not built to withstand the real-world temperatures that DVR's are subjected to in the security industry. Excessive heat causes a shorter life span for DVR's and can cause unexplained operation or crashes.

**WE HAVE FOUND A WAY TO MANAGE OVER HEATING PROBLEMS AND EXPLAIN FAILURES. EagleWatch Network DVR is exceptionally cooled by supervised fans. Our DVR software has Watchdog Supervision that reports and logs any failures of the software and it forces the computer to reboot.**

3. Most DVR's have problems with variances in voltage which may cause the DVR to fail. When DVR's don't get the voltages they require, they cease to function correctly. The cause of the failure often remains unknown since most DVR's can't tell you why they failed.

**WE HAVE FOUND A WAY TO CONTROL THE VARIANCES IN VOLTAGE AND MONITOR Voltages, TEMPERATURES AND FAN SPEED. Every EagleWatch Network DVR comes with a Uninterruptible Power Supply (UPS) that filters voltage and allows the DVR to continue operating at optimal voltage during power surges, brownouts, and even for several minutes after a power failure. Visual and audible warnings foretell the onset of serious damage to the DVR and logs all events.**

4. Most DVR manufacturers skimp on the processing power. They tend to build DVR's that meet the minimum standards of Intel and Microsoft. Price and profits are their motivation, not quality and certainly not security.

**WE HAVE FOUND A BETTER WAY TO BUILD AN EXCEPTIONAL DVR AND STILL KEEP COSTS REASONABLE. We feel that something used in critical operations, like DVR security, should not be compromised by cheap, underpowered computer processing methods.**

We compared our SPECIFICATIONS with those of some popular DVR's currently available...

	Brand X	EagleWatch
<b>CPU Processor</b>	Intel P4 1.8GHz or higher 512K Cache 400MHz	Intel P4 3.0GHz or higher with HT Technology 1MB Cache 800 MHz
<b>System Board</b>	Intel 845, 865, 875 Chipsets	Intel 865 or 875 Chipsets
<b>Memory</b>	30 & 60 FPS Boards: 256MB SDRAM 120 & 240 FPS Boards: 512MB SDRAM PC133	30 & 60 FPS Boards: 1GB DDR PC3200 120 & 240 FPS Boards: 1GB PC3200 Dual Matched DDR
<b>Hard Drive</b>	7200 RPM—8MB Cache: IDE Avg. Seek 9.5 to 12ms	7200 RPM—8MB Cache: SATA with NCQ Technology Avg. Seek 5.2 to 9.5
<b>Graphics</b>	64MB Graphics ATI, nVidia or Intel Extreme Graphics II Onboard Chipset (Shared Memory)	256MB Graphics ATI APG 8X Graphics w/ VGA & Video Out (we don't use shared memory — our video cards have their own DDR Video Memory chips)
<b>Operating System</b>	Windows XP PRO	Windows XP PRO SP2 + all updates
<b>LAN</b>	10/100 Ethernet	10/100/1000 Intel Pro Gigabit Ethernet — auto negotiating

## The EagleWatch Network DVR

is one of the highest performance digital video recorder's built for today's intuitive security markets. With this innovative product, users can record and monitor up to 32-cameras at a site at any time. Each DVR can be easily linked to other DVR's to monitor hundreds of cameras. Switches can be activated and deactivated allowing complete control of cameras & DVR functions by motion sensors, door contacts and numerous other inputs.

Preset positioning for Pan Tilt and Zoom Cameras allow full camera control from any on-site or offsite location.

Two way video conferencing and remote notification have proven to keep out unwanted intruders and reduce travel expenses.

With remote client and web browser software you can now view and manipulate our DVR from any remote location via LAN, WAN or Modem. There is also PDA software for wireless viewing on a pocket PC and advanced cell phones.

Backing up events, live remote recording and very rapid searching through pre-recorded information can all be accomplished through the

**EagleWatch Network DVR.**

If it's not an EagleWatch Network DVR,

It's just a DVR!

The EagleWatch Network DVR was developed as a complete security and management tool. Feel safe and secure in your home or business with the knowledge that the EagleWatch Network DVR is always recording, well supervised and dependable.

**High Security** features include supervised fans, power supply voltages, temperatures and hard disk drive health. Stores up to 2-Terabytes internally and includes a built-in Multimedia reader/writer and dual sided DVD/CD Burner.

**High Security**
