The **EagleWatch Network DVR** is one of the highest performance digital video recorder's built for today's intuitive security markets. With this innovative product, users can record and monitor up to 32-cameras at a site at any time. Each DVR can be easily linked to other DVR's to monitor hundreds of cameras.

Switches can be activated and deactivated allowing complete control of cameras & DVR functions by motion sensors, door contacts and numerous other inputs.

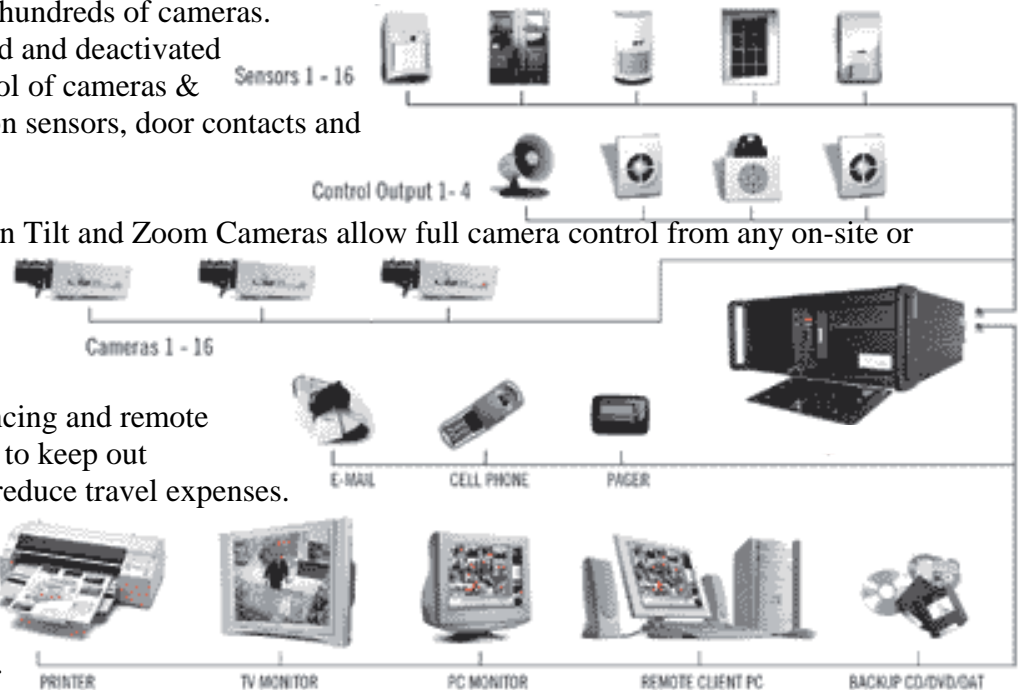

Preset positioning for Pan Tilt and Zoom Cameras allow full camera control from any on-site or offsite location.

Two way video conferencing and remote notification have proven to keep out unwanted intruders and reduce travel expenses.

With remote client and web browser software you can now view and manipulate our

DVR from any remote location via LAN, WAN or Modem. There is also PDA software for wireless viewing on a pocket PC and advanced cell phones.

Backing up events, live remote recording and very rapid searching through pre-recorded information can all be accomplished through the **EagleWatch Network DVR**.

The **EagleWatch Network DVR** was developed as a complete security and management tool. Feel safe and secure in your home or business with the knowledge that the **EagleWatch Network DVR** is always recording, well supervised and dependable.

High Security features include supervised fans, power supply voltages, temperatures and hard disk drive health. Stores up to 7-Terabytes internally and includes a built-in Multi-media reader/writer and dual sided DVD/CD Burner.

**If it's not an EagleWatch Network DVR,
It's just a DVR!**
